

MANISHA KUMARI

QA Engineer | 3.4 Years Experience

Noida, India | +91-7717791982 | manisha.k8184@gmail.com | [linkedin.com/in/manisha-kumari-9aa674326](https://www.linkedin.com/in/manisha-kumari-9aa674326)

PROFESSIONAL SUMMARY

QA Engineer with 3.4 years of hands-on experience designing and automating test frameworks for web, API, and mobile applications. Develop automation solutions using Selenium WebDriver (Java), Playwright (JavaScript/TypeScript), and API automation. Integrate automation suites with Jenkins CI/CD pipelines using Git and Maven, and drive quality delivery in Agile/Scrum teams. Convert manual test cases into scalable automated suites and apply SQL-based validation to ensure end-to-end release quality.

TECHNICAL SKILLS

Automation Tools: Selenium WebDriver, Playwright, Appium, REST Assured, Selenium Grid, TestNG, Cucumber BDD

Languages: Java, JavaScript, TypeScript, SQL

Frameworks: Page Object Model (POM), Data-Driven Testing, BDD/TDD, Hybrid Framework

API Testing: REST Assured, Postman, Swagger, REST API, JSON/XML Validation, API Automation

CI/CD & Build: Jenkins, Git, GitHub, Maven, CI/CD Pipelines, Continuous Integration

Testing Types: Functional, Regression, Smoke, Sanity, Integration, System, UAT, Cross-Browser, Parallel Execution, End-to-End

Mobile Testing: Appium, Android, iOS, Mobile Automation

Tools & Management: JIRA, Test Plan, Test Case Design, Defect Life Cycle, Bug Reporting, Test Summary Report

Methodologies: Agile, Scrum, SDLC, STLC, Sprint Planning, Requirements Analysis

WORK EXPERIENCE

QA Engineer | **Binmile Technologies** | Noida

Dec 2024 – Present

- Build scalable automation frameworks using Selenium WebDriver (Java) and Playwright (TypeScript) with Page Object Model (POM).
- Convert manual test cases into automated regression, smoke, and sanity suites using Selenium and Playwright, reducing sprint regression execution time by 60%.
- Automate REST API tests using REST Assured; validate endpoints, status codes, and JSON payloads via Postman and Swagger.
- Integrate automation suites into Jenkins CI/CD pipelines to enable continuous testing on every build.
- Run cross-browser tests and parallel execution via Selenium Grid, and apply Data-Driven Testing (DDT) for wider coverage.
- Execute Functional, Integration, Regression, System, Smoke, Sanity, and UAT testing each release cycle.
- Debug automation failures, perform root cause analysis, and update scripts to match application changes.
- Write SQL queries to verify backend data integrity and validate business logic end-to-end.
- Log and track defects in JIRA; produce test execution reports and sprint-level test summary reports.
- Attend sprint planning, daily standups, and retrospectives to align QA deliverables with Agile sprint goals.

Software Test Engineer | **GYL Digital Solutions Pvt. Ltd.** | Pune

Dec 2022 – Dec 2024

- Develop and execute test cases, test scenarios, and test data from functional requirements and business specifications.
- Build Selenium WebDriver (Java) automation scripts using Page Object Model (POM) to improve regression coverage.
- Convert manual test cases into automated regression and smoke suites using Selenium WebDriver (Java) with POM, growing automation test coverage from scratch to over 50% of total test cases.
- Test iOS and Android mobile applications using Appium to confirm cross-platform functionality.
- Run cross-browser tests on Chrome, Firefox, Edge, and Safari to validate UI consistency.
- Execute Functional, Regression, Integration, Smoke, Sanity, and System testing across all application modules.
- Test REST APIs using Postman to validate endpoints, request/response payloads, and authentication flows.
- Write SQL queries to verify database records and confirm end-to-end data accuracy.
- Track and manage defects end-to-end in JIRA; prepare test execution and defect summary reports.
- Collaborate with developers, BAs, and product owners in Agile/Scrum sprints to ship quality releases on time.

KEY PROJECTS

AESL-WFM — Workforce Management Application

- Build end-to-end Selenium automation suites for scheduling and reporting modules; integrate with Jenkins CI/CD.

Dentalkart — E-Commerce Platform

- Automate purchase workflows and API tests using REST Assured and Postman; perform cross-browser and mobile testing.

BMS Masood — Business Management System

- Design web automation framework; execute API tests via Postman and validate database records using SQL queries.

EDUCATION

Bachelor of Technology (B.Tech)

2015 – 2019

Ramgarh Engineering College, Jharkhand

CERTIFICATIONS

- Pursuing ISTQB Certified Tester Foundation Level (CTFL)
- Hands-on training: Playwright with TypeScript for modern web automation
- Ongoing upskilling in cloud testing tools: BrowserStack and Sauce Labs
